

South Harrell's Ferry Road Project Look-Ahead

The following reflects the projected look-ahead of scheduled activities planned for the South Harrell's Ferry Road Project:

- Based upon the most recent weekly project meeting (held to specifically discuss the work progress and schedule for the South Harrell's Ferry Road closure), the Contractor estimates that one lane in each direction will re-open on new pavement from Jones Creek Road to O'Neal Lane **the week of November 15, 2010.**
- Immediately following the traffic advisory announcing the extension of this road closure (issued August 19, 2010), the City-Parish Department of Public Works, the Green Light Plan team, and the Contractor for this project met and continue to meet weekly to assess work progress, additional delays caused by weather and unexpected utilities, work scheduled for the upcoming week, manpower and equipment, along with other items relevant to the construction of this project and the reopening of this segment of South Harrell's Ferry Road.
- The re-opening of this roadway segment has been and continues to be a top priority for the City-Parish. All personnel assigned to this project are working diligently to ensure the roadway is reopened and the project is completed as expeditiously as possible.
